SITE AUDIT · OCTOBER 15, 2026

6311arts.com site audit

Prepared for 6311Arts.com

Client Sponsor: **Holly King** Architect: **Robert Felkins**

AGENDA

Architect4Hire

What we will cover today

The good, the bad and the ugly of 6311arts.com today

1. **At a glance**
   Summary and what to fix first
2. **The good**
   What works today and is worth keeping
3. **The bad**
   What costs speed, search rankings and bookings
4. **The ugly**
   What a visitor, a regulator or an attacker notices first
5. **What's next**
   What we couldn't measure and where this leads

Architect4Hire

AGENDA · 01 OF 05

At a glance

Summary and what to fix first

The site has a strong voice and real content, but a heavy plugin stack, a public user list and a hidden About page hold it back.

Architect4Hire

The good, the bad and the ugly

THE GOOD

Solid foundations

- Managed WordPress.com hosting with a CDN
- Clean URLs, canonical tags and a sitemap
- Astra, a lightweight and well-kept theme

THE GOOD

A clear voice

- "An art center that makes room for everyone"
- Exhibit archive back to the November 2025 opening
- Three simple membership tiers

THE BAD

Heavy and hard to browse

- About 25 plugins and two layout systems
- Every section rendered twice, desktop and mobile
- Classes sold as shop products, out of date order

THE UGLY

Exposed and hidden

- Public user list with 6 login names
- About page hidden from Google
- Privacy Policy and Terms link to #

01 · FIX FIRST

Architect4Hire

An afternoon's work closes the worst gaps

30 MIN · SECURITY

Block the public user list

- /wp-json/wp/v2/users returns 6 login names
- Delete armemadmin, left over from ARMember
- Two-factor login for every remaining account

15 MIN · SEARCH

Let Google see the About page

- Remove noindex, nofollow from About
- Write a real meta description for each page
- Purge the cache after the change

1 HR · LEGAL

Publish Privacy and Terms

- Replace the # links in every footer
- Needed for payments and the Meta pixel
- Add returns and shipping terms to the shop

30 MIN · SECURITY

Take the login off public pages

- Header login dropdown with a math captcha
- Invites credential stuffing, confuses visitors
- Staff sign in at /wp-admin instead

01 · THEN A CLEANUP SPRINT

Architect4Hire

The rest is a week of cleanup

1 DAY

Cut the plugin stack

- Drop Newspack Blocks, Metricool and unused feeds
- Export CPT UI's artist type to code
- Choose Beaver Builder or the block editor

1 DAY

Render each section once

- Separate desktop and mobile copies today
- Doubles page size and confuses screen readers
- One responsive row per section

2–3 DAYS

Make Classes a real calendar

- Sorted by date, every session listed
- Instructor and description on each class
- "8 spots left" instead of "8 in stock"

ONGOING

Artists and images

- A photo, bio and their own links for every artist
- Real alt text instead of IMG_6232 or blank
- Jetpack comments off everywhere (15 min)

Architect4Hire

AGENDA · 02 OF 05

The good

What works today and is worth keeping

Managed hosting, a CDN, clean URLs and a clear voice. These are the foundations to keep.

02 · THE GOOD

Architect4Hire

Foundations worth keeping

PERFORMANCE

Managed and cached

- WordPress.com handles caching, PHP and the CDN
- Jetpack image CDN resizes and serves WebP
- Jetpack Boost installed, ready to switch on

WORDPRESS

Clean structure

- Pretty permalinks, canonical and Open Graph tags
- Sitemap with images; robots.txt set up well
- Akismet on spam; Astra a sensible base

VOICE

A clear point of view

- "An art center that makes room for everyone"
- The 6-mile artist radius says who it's for
- Hours, phone, email and address on every page

CREDIBILITY

Real work on show

- Exhibit archive back to the November 2025 opening
- Breadcrumbs and a written cancellation policy
- Three prices, three discounts for members

Architect4Hire

AGENDA · 03 OF 05

The bad

What costs speed, search rankings and bookings

Too many plugins doing overlapping jobs, and shop products standing in for a class calendar.

Architect4Hire

About 25 plugins doing overlapping jobs

LAYOUT

Two layout systems

- Beaver Builder, Astra Pro and BSF Custom Fonts
- Both load CSS on every page
- Keep Astra; move pages to blocks over time

MARKETING

Five tracking integrations

- Metricool, Facebook, Google Listings, Reddit, Site Kit
- Each one adds its own scripts
- Keep Site Kit and the Meta pixel; drop the rest

NEWSLETTER

Two newsletter systems

- MailPoet plus a Beaver Builder subscribe form
- Unclear which one receives sign-ups
- Pick one and remove the other

UNUSED

Installed, not used

- Newspack Blocks: built for news publishers
- VideoPress and Blaze: no video or ads on the site
- Search & Filter Pro: the shop's filter is empty

Architect4Hire

Heavier pages than they need to be

WHAT WE SAW

- ✓ *Headings, hours, contact and exhibits appear twice in every page*
- ✓ *Login dropdown, cart drawer and comment loader ship on every page*
- ✓ *Google Maps iframes on About and every class page*

THE FIX

- ★ *One responsive row instead of desktop and mobile copies*
- ★ *Load hidden UI only on the pages that use it*
- ★ *A static map image that links to Google Maps*

Also: About is served from a stale cache (Site Kit 1.186 vs 1.189). Purge after updates.

Architect4Hire

Search engines get a muddled picture

META

Junk meta descriptions

- Memberships: "gray$ 100 / year5% off"
- Submit Your Work ends in "Loading..."
- Artists: "Posts about Candice Johnson written by C"

SCHEMA

No Event schema

- Classes are WooCommerce products via FooEvents
- Google sees products, not events
- Event markup gets classes into event listings

DATA

Messy records

- Slugs carry stale dates (10-17 for a 10/24 class)
- Duplicate products ending in -2
- & shows as text in the tagline and alt text

STRUCTURE

Headings and links

- Two H1s on Classes; site name is the H1 everywhere
- Artist pages link the gallery's Instagram
- Artists' own links are missing

Architect4Hire

Hard to browse and book

CLASSES

Hard to scan

- Not in date order: 10/24, 11/8, 11/4, 10/22…
- No descriptions or instructors on the list
- 5-week courses show only the first date

SHOP

65 pages, no filter

- 12 items per page and an empty Filters link
- "Availability: 8 in stock" on a class
- Free opening reception sold as a $0.00 product

ARTISTS

A bare list of names

- 54 names, no images, two duplicates
- Malformed names like "Audrey AvrilMedium:"
- Artist pages are product grids with no bio

NAVIGATION

Key pages hidden

- Memberships reachable only through search
- Submit Your Work tucked under About
- "Classes" goes to /events/

Architect4Hire

Small things visitors notice

HOURS

Shorthand hours

- "mon – tues: by appt"
- Better: "Mon–Tue: by appointment"
- Add the phone number: 872-370-4500

DIRECTIONS

Directions open DuckDuckGo

- Most visitors expect Google or Apple Maps
- Swap the link; keep the address visible
- Same fix on the class pages

TYPE

All-lowercase names

- A brand choice that works on display headings
- On staff names and products it reads as an error
- Keep lowercase for display headings only

TYPOS

Typos and mixed formats

- "Ofrenda/Alter" should be "Altar"
- Times mix "10AM-1PM" and "6:30-9:30pm"
- The cart shows "Tax$0.00"

Architect4Hire

AGENDA · 04 OF 05

The ugly

What a visitor, a regulator or an attacker notices first

A public user list, a login form on every page, a hidden About page and policy links that go nowhere.

04 · THE UGLY

Architect4Hire

What an attacker or regulator sees first

SECURITY

The user list is public

- /wp-json/wp/v2/users returns all 6 login names
- Including armemadmin, left over from ARMember
- Hands half of every login to anyone who asks

SECURITY

A login form on every page

- Header form with a "8 + 5 =" captcha
- Invites credential stuffing
- Confuses visitors who aren't staff

SEARCH

About is hidden from Google

- The page carries noindex, nofollow
- The mission and the building's history never show
- Fixed by unchecking one setting

LEGAL

Privacy and Terms go nowhere

- Both link to # on every page
- The site takes payments and runs the Meta pixel
- Processors and Meta expect a real privacy policy

Architect4Hire

Loose ends in public

TEMPLATE

Leftover template parts

- "Loading Comments..." on shop, about, artists
- "Something went wrong" in the newsletter form
- A link that reads javascript:void(0)

IMAGES

Placeholder imagery

- High school show image: "were-working-on-it..."
- Logo alt text reads "6311artsWHITELINE"
- Use a real image or a branded placeholder

ACCESS

Accessibility basics missing

- Newsletter fields have no labels
- About gallery images have empty alt text
- Archive images are named IMG_6232

RISK

Why it matters

- Legal exposure under the ADA
- Lost image search traffic
- Screen readers read the hidden text too

Architect4Hire

AGENDA · 05 OF 05

What's next

What we couldn't measure and where this leads

The checks still to run, and how Project Rogers Edge fixes each finding for good.

Architect4Hire

What we couldn't measure

NOT VERIFIED

- ✓ *The sandbox couldn't reach 6311arts.com directly*
- ✓ *Google's PageSpeed service was over its quota*
- ✓ *Performance findings come from the plugins and markup*

NEXT CHECKS

- ★ *Run PageSpeed on Home, Classes and Shop, mobile first*
- ★ *On a phone, check whether the hidden error messages show*
- ★ *Confirm which newsletter tool receives sign-ups*

Sources: Home, Classes, Shop, Gallery, Artists, About, Memberships, REST index, robots.txt and sitemap, read Oct 15, 2026.

05 · WHAT'S NEXT

Where this leads

NOW

Fix the live site this week

- Lock the user list; delete dead accounts
- Unhide About; publish Privacy and Terms
- Remove the header login

ROGERS EDGE

Designed out by the rebuild

- Studio and Square replace the plugin stack
- Classes as a real calendar with spots left
- Each section rendered once

ROGERS EDGE

Built in from day one

- SEO fields and Event schema on every page
- Alt text required when images are uploaded
- Artist profiles with photo, bio and links

ROGERS EDGE

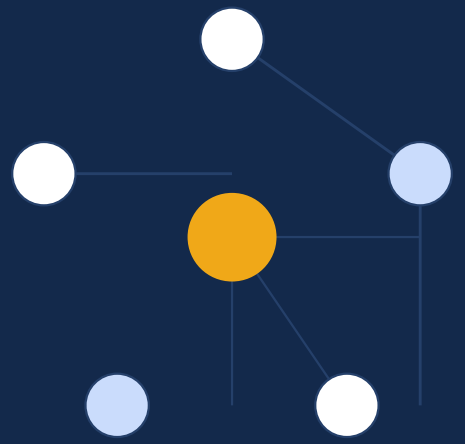

Protected at launch

- Every old URL redirected; rankings kept
- Page speed measured before go-live
- Accessibility checked during UAT

LET'S TALK

Questions?

Push on the ideas, the trade-offs and the order of the work — that's what this conversation is for.
